

Invitation to Exhibition

Issues associated with Environmental Geotechnics continue to be a major preoccupation for governments, public and private organizations and the general community around the world. With the support from the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE) and the Technical Committee of Environmental Geotechnics (TC215), the Environmental Geotechnics Congress Series has been held regularly since 1994 (Canada 1994; Japan 1996; Portugal, 1998; Brazil 2002; UK 2006; India 2010; Australia 2014), and has established itself as a highly influential forum for exchange and discussion on the subject.

Out of 340 abstracts received, 8ICEG chose 262 full manuscripts and 6 extended abstracts submitted from 28 countries and regions in 5 continents for publication in this conference proceedings. 11 comprehensive manuscripts, together with 6 extended abstracts, were contributed from the Plenary Lecturers from 11 countries, which includes 8 academicians, 4 editors of major journals, and 6 chairpersons of international renowned organizations. 300~500 delegators are expected to attend the congress, which provides a platform for scholars and practitioners to share and exchange their experiences with their peers. Before the congress, several "Short Courses" will be provided for 200~300 engineers and academicians from domestic institutes and consulting companies, which related to the solid waste landfilling and the underground contamination remediation.

The Ministry of Education Key Laboratory of Soft Soils and Geoenvironmental Engineering, Zhejiang University, CISMGE and HKGES cordially invite you to attend the 8th International Congress on Environmental Geotechnics in the week of October 28th, 2018 in Hangzhou, China.
